Average earnings of employees in the manufacturing industries of Columbus, Ohio, were \$3.50 a year in 1880. After ten years of continued protection they had grown to \$4.50 a year. In the meantime the number of persons who found work in the same establishments rose from 5,490 to 9,778. Protection means increasing employment at ever rising wages.

Reports from Washington indicate that Mr. Crisp is almost as profound of the snub he received from the Reform Club as the Englishman who was of the kick he got from a real lord.

The office seekers are still wondering whether there will be anything for them on Mr. Cleveland's Christmas tree. If there is, it will probably be a few high hanging perambulators which only those having long poles in their hands can hope to reach.

Since March, 1889, the public debt has been reduced \$259,674,390. There have been pension payments of \$432,564,178, and sugar revenue amounting to \$92,000,000 has been retained by the people. Still Democrats are chattering about deficiencies.

Chicago should be ashamed of itself. It gave a surprisingly large majority to the party in Congress which did what it could, first to prevent and then to cut down a handsome appropriation for the World's Fair—a concern that the Republican party instinctively championed. Credit the Windy City with base ingratitude.

The Russian Government has issued a ukase or decree requiring Jewish artisans to reside where official boards of trade exist. In these official boards of trade exist in only about 10 per cent. of the towns in Russia, this latest edict will bear particularly hard upon that unfortunate people. The object of the Russian authorities is sufficiently apparent, and the result cannot but be another exodus, with all its consequent misery on the frontier and elsewhere.

In order that the readers of THE LEDGER may have some diversion with which to occupy their minds and during at the same time to attract public attention to our newspaper, we have concluded to propose a game of chance, to be played by our subscribers and readers may become interested in our effort to afford amusement.

Public interest during the next few weeks will be more centralized in the coming city election than in any other local matter, and we have, therefore, selected that as the basis of our gaming contest.

We have selected as the races to be guessed upon these three: City Marshal, Collector and Treasurer and Assessor; for the reason that they seem to be the most complicated, and more interest will probably be manifested in them, as there are three or more candidates for each office. The outcomes in these contests will be harder to anticipate, and, therefore, our scheme will prove the most interesting.

For the office of City Marshal there are six candidates announced, as follows: M. E. McCallip, E. W. Fitzgerald, John W. Alexander, John V. Day, James McDonald and W. B. Dawson.

For Collector and Treasurer there are two candidates: James W. Fitzgerald and Horatio Ficklin.

Also three for Assessor: Charles D. Shepard, Fred W. Bauer and John Walsh. There are 142 voters registered.

We propose to give in prizes \$17 50 in gold, as follows:

The first prize of \$10 in gold will be given to the first person who names the winner in each contest and also guesses nearest to the exact number of votes received by each.

A second prize of \$5 in gold will be given to the person making the next best guess.

A third prize of \$2 50 in gold will be given to the person making the third best guess.

In making guesses the following rules must be observed:

First—All guesses must be made on the following form out from THE LEDGER and forwarded by mail or handed in person to this office.

Second—Guesses must be made in each of the three contests in order to receive consideration.

Third—Your name and Postoffice address must be signed at the bottom of your guess.

In awarding prizes we will place no account of the time they are received will be taken into consideration. These prizes will be given to those entitled to them by reason of their guesses, no matter at what time and guesses are received.

All guesses must be made so that they will reach this office by 1 o'clock p. m. on Saturday, December 31st, 1892.

Any one man, woman or child, can guess. Fill out this blank as indicated and cut it out and forward by mail to FRANK LADDER, Mayville, Ky., or hand in person to this office.

ONE of the curious features of Democratic warfare on American labor and capital has been its total disregard of the interests of the so-called raw material industries.

Our raw material industries, Material Interests. The Democratic orator and editor has usually fought shy of declaring for free-trade in manufactures, notwithstanding that the Chicago platform, explicitly demands it. He was not moved to this through fear of the manufacturer, but through fear of antagonizing the manufacturing industries and the labor they employ. But he has never hesitated to pronounce for free materials, in utter disregard of the interests of the labor and capital employed in producing them, on the evident assumption that the interests are so insignificant, compared to the manufacture of finished products, that they might be assailed with impunity. The "raw material" industries of this country, however, are more important than assumed by the labor and capital they employ and the value of their products, than are the industries which produce the so-called finished products.

From census statistics collected up to date it is estimated that the value of all manufactured products during the year was \$2,700,000,000; the cost of materials, \$4,810,000,000; that is, the manufacturing establishments took products valued at the latter sum and added \$2,710,000,000 of value to them, what gave these materials their value? It was treated in precisely the same way as the added value created in the process of manufacturing by the employment of labor and capital. In fact, they themselves were as truly manufactures as the finished products of which they subsequently formed a part. The manufacture of "materials" is, therefore, more important than the manufacture of finished products in the ratio of \$4,810,000,000 to \$2,710,000,000.

So let it not be forgotten that more workers and larger interests are menaced in the Democratic program of free raw materials than are concerned in the production of finished products. Free-trade is to begin in our larger instead of our small fields of productive employment.

PARADES this year got about twice as much for their prizes as the did in 1917. The increased prize, the prizes should explain, is due to a short-circuited by the debilitating effect of McKinley law on the American
